

HIGH PRESSURE JETTING

JB ALLO
SEWAGE

What is
High Pressure Water
Jetting process?

IT'S THE PROCESS WE USE AT **JB ALLO SEWAGE** IN ABOUT 95 % OF ALL **SEWER CLEANING** PROCESSES FOR **REMOVING DEPOSITS** WITHIN THE SCOPE OF REGULAR **MAINTENANCE** AS WELL AS FOR **CLEANING** AS A PREPARATORY MEASURE FOR **SEWER INSPECTION** OR **REHABILITATION**.

Our **high pressure jetting** service is targeted to customers whether they are individuals or professionals, to enable them to have both a preventive and reactive maintenance of their **sewerage network**. This innovative method uses a **high pressure water jetting** destined to **clean drains** and **sewers of restrictions and blockages**. In industrial and commercial environments, the substances causing blockages are often harder and more difficult to remove than those found in domestic drains but with the technology used by **JB Allo Sewage**, the **unblocking** becomes easier. The equipment used can be applied in **sewerage networks** with diameters varying from 50 mm up to 1,500 mm.

YOU HAVE GOT A SEWAGE PROBLEM? WE HAVE THE SOLUTION.

ISO 9001 : 2015 CERTIFIED

PUMPING SEWAGE LIFT STATION

JB ALLO
SEWAGE

What is
Pumping Sewage Lift
Station service?

SEWAGE LIFT STATIONS ARE USED TO MOVE WASTEWATER TO HIGHER ELEVATIONS IN ORDER ALLOW TRANSPORT BY GRAVITY FLOW. IT IS A NECESSITY FOR **PROFESSIONALS** TO PERFORM AN OBLIGATORY **CLEANING** ACTIVITY WHICH **JB ALLO SEWAGE** PROVIDES IN ORDER TO AVOID ANY COMPLICATIONS THAT MIGHT HARM THEIR **PUMPS** AND THE DISPOSAL OF THEIR **WASTEWATER**.

Our **pumping** service is designed to accommodate all kinds of **lift stations** with different depths varying from 2 meters up to 30 meters. The constant maintenance of these **lift stations** guarantee a high level of **hygiene** and comfort as well as a high functionality of the disposal of the **wastewater** generated whether by a small household or a large facility. **JB Allo's process** involves stopping the **drainage of the waste water** in the first place and then evacuating the **clean water** that is in the station, after a test is carried out in order to detect the presence of **hazardous gas** which allows our fully safe and equipped workforce to descend to the inside the station to clean it of all sludge and residues that can block the pumps of the station. Once the cleaning and sludge removal steps are completed, the pumps are flushed to ensure a neat cleaned up **sewage lift station**.

CCTV DRAIN SURVEYING

JB ALLO
SEWAGE

What is
CCTV Drain Surveying
service?

CCTV DRAIN SURVEYING IS AN INNOVATIVE AND FAST **INSPECTION CAMERA** TECHNOLOGY THAT GUARANTEES A VERY COST EFFECTIVE WAY OF INSPECTING BOTH **DRAINS** AND **SEWERS**. **JB ALLO SEWAGE** USES TWO TYPES OF TECHNOLOGIES (MANNED AND REMOTELY CONTROLLED) DESIGNED FOR YOUR EXACT NEEDS TO PROVIDE YOU WITH HIGH DEFINITION VISUALS AND WINCAN REPORTS.

The technology of **CCTV drain surveying** is crucial to identify the source of any of your **sewerage problems** and assess the cause of a **blockage** or **damage**. **JB Allo Sewage** uses the latest **CCTV technology** and all of our staff are skilled in its use, this advanced technology makes inspecting **drains** and **sewers** more efficient than ever. The footage and images obtained through our equipment are clear enough to guarantee identification of problems on the first pass, removing the need for further diagnostics, and therefore additional investment at a later date. Our manned and remote controlled equipment can inspect **pipes** with varying diameters from 80 millimeters to 1,500 millimeters and with minimal disruption of your activities. **JB Allo Sewage** provides also a detailed and comprehensive report with all the technical details for the perusal of our clients in order to be aware of what their problem is. In addition, our **WinCan software** permits us to give our clients all the information on the inspection conducted on their conditions **pipelines**.
